DECLASSIFICATION REVIEW by NIMA/DOD 4/12/00

MEMORANDUM FOR: Chief, Military and Economic Area, CIA/ORR
Chief, DIAAP-1CIA

25X1A

ATTENTION: [REDACTED] CIA/ORR
DIAAP

SUBJECT: Soviet Ground Forces and Logistical Installations,
Turkestan Military District, USSR - negation list

REFERENCE: a. Supplement to C-RR4-81,615
b. NPIC Project 11908-4

1. In response to reference (a), the CIA/IAD was requested to search the Turkestan Military District, USSR, and identify and report on all significant Ground Force Military Installations. A total of 68 Ground Force Installations were selected and reported (see Annex A). The selection of the initial targets was made from the AL, BE, TDI, USATC 200 Series, NPIC target BLIP's, and the area photographic scan.

2. A total of 9 installations that were initially selected as separate targets were, in the course of the project, combined with another installation because of location proximity (see Annex B).

3. The availability and utilization of good quality photography enabled the negation of 26 initially selected targets (see Annex C).

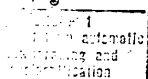

4. Poor quality small scale photography, the absence of photography and the location of installations within congested urban areas precluded the interpretation of 38 of the selected targets (see Annex D).

5. A summation of the targets selected within the Turkestan MD is as follows:

Installations reported	68
Installations combined	9
Installations negated	26
Installations not reported	<u>38</u>

141

6. The mensuration for all targets reported in this project was performed by analyst in the CIA/IAD/GMB, and not by the NPIC Technical Intelligence Division.
